NEWMARKET, N. H., Feb. 15, 1911.

We, the undersigned, Selectmen of the Town of Newmarket, have examined the foregoing accounts and found them correctly cast, with corresponding vouchers.

WILLIAM H. GARNER,	} <i>Selectmen</i>
GEORGE H. TOWLE, JR.,	
WILLIAM J. O'CONNOR,	

of Newmarket.

REPORT OF THE WATER BOARD.

For the benefit of the tax payers, the members of the water commission wish to bring to their notice such repairs and improvements as have been made during the past year, the condition of the plant, and recommendations for the future.

Last year your commission recommended the installation of a new boiler and auxiliary pump. But owing to the financial condition of the town they have only purchased and installed the boiler this year, leaving the pump for next year. Until such time as a new pump may be put in, a connection has been made, with a shut-off valve, to the large steam pump of the Newmarket Manufacturing Co. This is to be used only in case of fire, and providing the town plant is out of commission.

In order to install the extra boiler, a small addition was made to the back side of the pumping station, one story high, eight feet wide and twenty-two feet long. The new boiler has a capacity of 125 horse-power, capable of carrying a working pressure of 125 pounds per square inch, and is tested and guaranteed under the very strict Massachusetts state laws. As the following report shows, it cost \$866.00 delivered at Newmarket, and the addition to the building, installing, piping, etc., will cost about \$1,650.00 more. A new concrete front and wooden top has been put on the dam, at a cost of about \$175.00.

Owing to the scarcity of water in the river, the pump has had to be run by steam 235 days, the longest time in any one year since the plant has been in operation. This has caused quite an increase in the general running expenses.

The commission wish to bring to your especial attention the necessity of an additional supply of spring water, as your present supply falls far short during dry seasons. As an abundant supply of pure water is absolutely necessary to the health of the town, this matter must be attended to in the near future.

ANNUAL REPORT

OF THE

Chief and Clerk of Fire Department.

NEWMARKET, N. H., Feb. 15, 1911.

TO THE TOWN OF NEWMARKET:

In compliance with the law, requiring the Chief Engineer of the Fire Department to make an annual report to the town, the following report is respectfully submitted.

FORCE OF THE DEPARTMENT.

The regular force of the department consists of a chief and three assistant chief engineers, two hose companies of 16 men each, one hook and ladder company of 12 men, and a driver for hose wagon No. 3. Each company is allowed to have five substitute members, who, when acting as such, are paid for their services by their principals when acting as substitutes, making a total force of 49 officers and men available for fire duty, all of whom are subject to monthly out-door drill except in winter. The companies are well officered, are under good discipline, and the service done by them at fires during the past year would be creditable to any fire department.

FIRE APPARATUS.

One hose wagon, capacity 1000 feet hose; two play pipes; two axes; two three-gallon chemical extinguishers; wagon is arranged to lay one or two lines of hose at once, as may be desired; one double runner hose pump of same capacity as hose wagon; two Gleason & Bailey hose carts, chain winding reels, each with a capacity of 700 feet of hose; 2500 feet $2\frac{1}{2}$ inch rubber-lined hose; 1000 feet 2-inch rubber-lined hose; nine flexible play pipes; four solid play pipes; four Callahan shut-off nozzles; two single hydrant gates; two two-to-one Siamese connections; one one-to-two Siamese connection; 32 spanners; seven hydrant wrenches; eight lanterns; four torches; two crowbars; 12 shovels; five hoes; four fire axes; eight coats; 18 fire hats.

The Gleason & Bailey steel frame truck, No. 2, carries one 45-foot East Somerville extension ladder; one 26-foot, one 25-foot, one 24-foot and one 18-foot single ladders on truck; also one pull-down hook and chain and rope; four hand hooks and poles; two crotch poles; two fire axes; two crowbars; two pick-head sledges; 12 rubber buckets; four firemen's lanterns; four pairs of boots; one signal lamp; one 13-inch gong.

Reserve ladders, one 30-foot and one 25-foot, and two roof ladders. The apparatus is all in good condition and ready for service.

FIRE ALARM.

One 12-inch steam chime whistle; one 2000 lb. bell and striker; two 18-inch gongs; two 6-inch gongs; twelve fire alarm boxes; seven miles of wire, and the proper amount of battery to sustain the same.

The line was inspected in the fall and put in as good condition as possible for the winter. The fact that the system of alarm has always been found in working order

when needed is a great source of satisfaction to the Board of Engineers, the superintendent of battery, the firemen, and citizens in general.

GENERAL REMARKS.

It will be seen by the clerk's fire report that the total amount of damage by fire the past year was \$5,175.54 and only \$4,175.54 insurance was paid, which leaves \$1,000, a total loss to Peter J. Smith on his barn and contents on account of the distance from the town.

To my associates on the Board of Engineers and to the officers and members of the fire companies, I hereby express my high appreciation of the promptness in responding to alarms and the cheerful manner in which you attended to your duties at fires.

WILLAM J. O'CONNOR,

Chief Engineer.

DIRECTIONS FOR RINGING IN AN ALARM.

When a fire breaks out the person discovering it should immediately run to the box *nearest the fire*, break the glass in the front of the small key box which is on the side of the fire alarm box, take out the key, which is attached to a chain, unlock the fire alarm box, open the door and pull down the hook *as far as it will go*, then let go the hook. Stand by box to direct the firemen. Don't pull in an alarm for a fire seen at a distance or out of reach of the hydrant system, but notify some member of the department, who will give the proper alarm.

FIRE DEPARTMENT SIGNALS.

Second alarm, 8 blows, for reserve apparatus and call firemen.

2 blows after fire alarm indicates fire all out.

2-2-2. Engineers' call; companies assemble at stations and await orders.

REPORT OF SCHOOL BOARD.

You will notice that the amount of money expended during this last fiscal year is slightly in excess of the expenditures of the preceding year. Although we have one teacher less this year than last, the increased salaries due to the increasing scale as applied to teachers offsets the amount saved by having one teacher less. Adding to this, money paid out for insurance and other necessities that were not due last year, fully explains the increase. In addition to the above there has been a change made in the date for the ending of the fiscal year, which date is now February 15. This is the first annual report that extends from February 15 to February 15 of the following year. Before this current year, the fiscal year ended with the close of the winter term, generally the last week in March. Accordingly, last year's report covered the period from the last week in March to the fifteenth of the following February, which was not a full year. The report for this current year includes those six weeks which ordinarily would have appeared on the last year's report had the change not taken place. Accordingly, this report actually covers the present year and the remaining six weeks of the preceding year. The most of the balance now in the hands of the Treasurer will be needed to pay the teachers, janitor and other bills due at the end of the present school term.
